Kame Brand Kit — Production Guide

> Single source of truth for all design, marketing, and development work.
> Last updated: March 21, 2026

---

1. Colors

Active Palette

Token	Hex	RGB	Use
Teal	`#48E6CD`	72, 230, 205	Brand primary — headlines, logo, tags, icons, interactive elements
Coral	`#FA6869`	250, 104, 105	CTAs, prices, highlights, emphasis
White	`#FFFFFF`	255, 255, 255	Slide/page backgrounds
Bone	`#F5F0E8`	245, 240, 232	Text on teal/coral surfaces (buttons, tags, chips)
Body	`#5A5A58`	90, 90, 88	Body/paragraph text — warm neutral gray
Body Light	`#7A7A78`	122, 122, 120	Captions, placeholders, secondary text

Decorative Fills (Blobs & Backgrounds)

Token	Value	Use
Teal blob	`rgba(72,230,205,0.07)`	Soft teal circle decorations
Coral blob	`rgba(250,104,105,0.05)`	Soft coral circle decorations
Teal tint	`rgba(72,230,205,0.12)`	Icon circle backgrounds, ghost tags
Coral tint	`rgba(250,104,105,0.10)`	Coral icon circle backgrounds

Retired Colors — DO NOT USE

`#1C1C1C` · `#112836` · `#1A2B3D` · `#00BFA5` · `#FF4D6A` · `#1AA39C` · `#F7F5F1`

---

2. Typography

Font Family

Plus Jakarta Sans — the only font used across all Kame materials.

Weights in use: 400 (Regular), 500 (Medium), 600 (SemiBold), 700 (Bold), 800 (ExtraBold).

Google Fonts import:

```
https://fonts.googleapis.com/css2?
family=Plus+Jakarta+Sans:ital,wght@0,300;0,400;0,500;0,600;0,700;0,800;1,600;1,700;1
```

Type Scale

Element	Class	Weight	Size*	Line-height	Letter-spacing	Color
Hero headline	`.hx`	800 ExtraBold	27–42px	1.06	-1.5px	Teal
Section headline	`.hl`	700 Bold	17–22px	1.14	-0.8px	Teal
Subheadline	`.hm`	700 Bold	13–17px	1.20	-0.3px	Teal
Body text	`.bd`	400 Regular	11–13px	1.55	0	Body `#5A5A58`
Tag / chip label	`.tag`	700 Bold	8–9px	—	1.2px	Uppercase
Logo "Kame"	—	700 Bold Italic	50px	—	-1px	Teal
Logo subtitle	`.logo-s`	600 SemiBold	8px	—	4px	Teal @ 50% opacity

Sizes at 320px reference card. Scale proportionally for other output sizes.

Accent Color in Text

- Coral `.ac` class: used to highlight key words within teal headlines (e.g., "is **broken.**")
- Teal bold: used to emphasize words in body text (e.g., "on **your** body")

---

3. Logo

Primary Logo

"**Kame**" in Plus Jakarta Sans **Bold Italic**, color **#48E6CD** (teal).

Below it: "**AI FASHION**" in Plus Jakarta Sans SemiBold, small caps, letter-spacing 4px, teal at **50% opacity**.

Rules

- Logo is always a single teal color — never split, never outlined, never gradient
- Minimum clear space: 1× the height of the "K" on all sides
- On dark backgrounds: use bone `#F5F0E8` instead of teal
- Watermark usage: bottom-left of slides, 30% opacity, 10–12px

Logo Files

- `KAME_logo.png` — primary logo on transparent background
- SVG text rendering in HTML: use the `.logo` CSS class

---

4. Design Elements

Blobs (Decorative Circles)

- Simple filled circles — **no borders, no strokes**
- Teal blob: `background: rgba(72,230,205,0.07)` — very soft, barely visible
- Coral blob: `background: rgba(250,104,105,0.05)` — even softer
- Always **bleed off slide edges** (partially cut off)
- Maximum 2 blobs per slide

Rings (Outline Circles)

- Very subtle teal outline: `border: 1.5px solid rgba(72,230,205,0.1)`
- Transparent fill
- Maximum 1–2 per slide, usually paired with a blob

Dots (Micro Decorations)

- Tiny circles: 4–5px diameter
- Teal or coral at 15–20% opacity
- Maximum 2 per slide
- Placed asymmetrically for visual interest

Dividers — Kame Signature

The double-line divider is a distinctive Kame design element:

```
[── teal bar ──] [– coral accent –]
```

- Teal bar: `height:1.5px; background:var(--teal); opacity:0.3` — width 16–36px
- Coral accent: `height:1.5px; background:var(--coral); opacity:0.35` — width 6–14px
- 4px gap between the two bars
- **Never use a single line divider**

---

5. Component Patterns

Tags / Chips

Variant	Background	Text Color	Border
`tag-teal`	`#48E6CD` solid	`#F5F0E8` bone	None
`tag-coral`	`#FA6869` solid	`#F5F0E8` bone	None
`tag-ghost`	`rgba(72,230,205,0.1)`	`#48E6CD` teal	None

All tags: `border-radius:14px; padding:5px 14px; font-size:9px; font-weight:700; letter-spacing:1.2px; text-transform:uppercase`

CTA Buttons

- Fill: `#FA6869` coral
- Text: `#F5F0E8` bone, 700 bold
- Border-radius: 26px (fully rounded pill)
- Shadow: `0 4px 18px rgba(250,104,105,0.22)`
- Always includes arrow → icon
- Padding: 13px 28px
- Font size: 13–14px

Step Numbers

- Steps 01, 02: Teal circle `#48E6CD`, bone text
- Final step 03: Coral circle `#FA6869`, bone text
- Circle size: 32px diameter
- Font: 12px, 800 ExtraBold

Icon Circles

- Teal: `background:rgba(72,230,205,0.12)` — size 34px
- Coral: `background:rgba(250,104,105,0.1)` — size 34px
- SVG icons inside: 15px, stroke style (not filled), 2px stroke width

Phone Mockups (UI Slides 13–20)

- Body: white `#FFFFFF`, rounded corners 12–16px
- Border: `2px solid rgba(72,230,205,0.18)`
- Shadow: `0 3px 14px rgba(0,0,0,0.05)`
- Notch bar: small rounded rectangle, teal at 12% opacity
- Screen area: dashed border `rgba(72,230,205,0.15)`, teal tint fill

---

6. Layout Rules

General Principles

- Clean, minimal, editorial — generous whitespace
- Left-aligned for content slides (icon list, how it works, feature+phone)

- Center-aligned for impact slides (brand identity, big stat, question, CTA)
- No clutter — every element earns its place

Slide Structure

- **Watermark:** "Kame" italic, bottom-left, 30% opacity — on every slide
- **Swipe hint:** "Swipe →" bottom-right, teal, 30% opacity — carousel slides only
- **Padding:** 36–52px from edges (at 320px reference)
- **Background:** Pure white `#FFFFFF`

Photography Placeholders

- Teal variant: `background:rgba(72,230,205,0.07); border:1.5px dashed rgba(72,230,205,0.15)`
- Coral variant: `background:rgba(250,104,105,0.05); border:1.5px dashed rgba(250,104,105,0.12)`
- Always include a subtle SVG icon + label text inside

---

7. Template Library

#	Template	Layout	Best For
01	Brand Identity	Centered	Pinned welcome post
02	Bold Hook	Left-aligned	First carousel slide, scroll-stopper
03	Big Stat	Centered	Data-driven impact numbers
04	Icon List	Left-aligned	Pain points, features, benefits
05	Centered Question	Centered	"What if" aspirational moments
06	Photo Comparison	Split 50/50	Expectation vs reality
07	How It Works	Left-aligned	3-step product explainer
08	App Showcase	Centered	Phone mockup with CTA
09	Quote	Centered	Social proof, relatable pain
10	CTA Finale	Centered	Last carousel slide, drive signups

#	Template	Layout	Best For
11	Platforms	Centered	Multi-platform value prop
12	Save & Share	Centered	Engagement driver
13	Single Phone	Centered	Single feature showcase
14	Dual Phone	Centered	Side-by-side screen comparison
15	Feature + Phone	Split L/R	Text description + phone demo
16	Swipe Demo	Centered	Card stack with action buttons
17	Before/After	Split 50/50	Without vs with Kame
18	Feature Grid	Centered	2×2 feature tiles
19	Onboarding Flow	Centered	3-step phone sequence
20	Full UI Preview	Centered	Hero phone display

---

8. Production Files

File	Resolution	Format	Use
`Kame_XX_Name.png` (×20)	1280×1280	PNG	Individual slide templates
`kame-white-bg.html`	Source	HTML	Master template — edit text, re-screenshot
`Kame_Templates_20.pptx`	10"×10"	PPTX	PowerPoint/Google Slides/Canva import
`KAME_logo.png`	Original	PNG	Logo file

Content Production Workflow

1. Choose template(s) from the library based on post type
2. Open `kame-white-bg.html` in a text editor
3. Duplicate the slide div, customize text and content
4. Screenshot with Playwright at 4× DPR (1280×1280 output)
5. Post to Instagram

Automation Pipeline (Future)

JSON config per post → Python script swaps text into HTML template → Playwright screenshots → n8n/Make.com posts to Instagram via Meta API.

---

9. Social Accounts

Platform	Handle	Status
Instagram	@KAME.aifashion	Active
TikTok	@kameapp	Pending
Domain	kame-ai.com	Registered (Cloudflare)
Email	contact@kame-ai.com	Active

Kame — See It, Swipe It, Own It.
